Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: on page 1, first paragraph of the specification, the references to the claims must be deleted.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 2, 3, 5, 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicants' acknowledged state of the art in view of Gulik et al 5,827,592. The primary reference discloses that elongated parquet elements are known in the art and that prefabricated parquets including a plurality of parquet strips attached to a substrate are known in the art. These parquet elements may be coated on their long edges with a material to prevent moisture penetration; see page 1, lines 5-20. The secondary reference discloses a wood flooring element wherein all edges are coated with a material to prevent moisture penetration; see column 3, lines 17-27. It would have been obvious to one of ordinary skill in the art to coat all edges of the parquet elements in the primary reference with a material to prevent moisture penetration in view of the teachings of the secondary reference to minimize the sensitivity to the action of moisture in the parquet elements.
